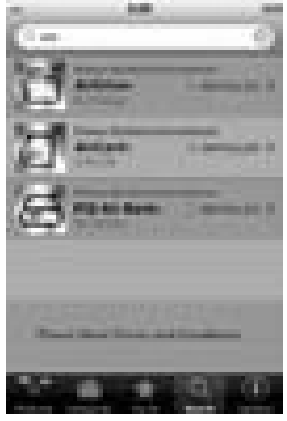
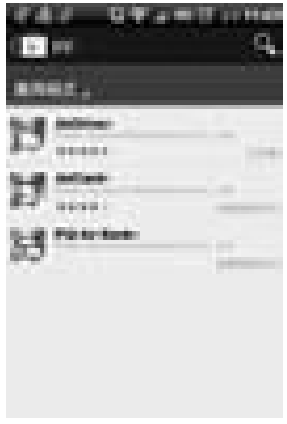
Getting Started

Step 1: Charging your “PQI Air” Bank
Please fully charge your “PQI Air” Bank before the first use. Connect the USB port to a PC or USB power adapter to charge your device. The orange LED indicator will turn off when charging has completed. The red LED indicator is lit when battery level drops below 20%. Please recharge as soon as possible.

Step 2: Prepare your content for “PQI Air” Bank
Connect the “PQI Air” Bank to the PC using the USB3.0 cable. “PQI Air” Bank will appear as a disk drive, and simply copy the files from your PC to “PQI Air” Bank.

Step 3: Download the free “PQI Air” Bank+” App from Apple App Store (iOS Device) or Google Play (Android Device).





Step 4: Turn on your “PQI Air” Bank
Press the power button for two seconds. First, the green LED indicator will light up and then the blue Wi-Fi LED indicator will begin flashing. Then, move onto the next step.

Step 5: On your mobile device, choose "Wi-Fi Settings" from the "Settings" menu. Then, choose “PQI Air” Bank to enable the connection.

Step 6: Once connected, launch the “PQI Air Bank+” application on your mobile device and start to browse the digital content from “PQI Air” Bank.

Note: Repeat steps 3~6 to share your “PQI Air” Bank with up to 5 different devices.

Step 7: Your “PQI Air” Bank becomes a wireless access point when plugging in an Ethernet cable.

Preferences: The following settings are available in the “PQI Air” Bank's "Settings" menu.

-"Wi-Fi SSID": Change the name of your “PQI Air” Bank. (It is recommended that you change your own SSID)

-"Password/Change Password": Enable password and setup a password to protect data from being accessed by unauthorized connections.
